

Go Green Going Green, Saving Green, Making Green

MUSEUM OF SCIENCE AND INDUSTRY VOLUNTEERS NEEDED!

Go Green is a combined youth financial, entrepreneurship and environmental education program presented through a partnership between the Economic Awareness Council ("EAC"), the Museum of Science and Industry ("MSI"), the City Treasurer of Chicago and the Federal Reserve Bank of Chicago for Money Smart Week ("MSW") 2015. Through *Go Green*, youth and families learn strategies for both home and business that are environmentally friendly and save money too! Youth experiment with various green technologies. Youth consider which technologies and strategies are most cost effective and even plan their own businesses for our 5th Annual Go Green Business Plan Challenge!

Volunteers are needed to assist youth in experimenting with green technology, assessing various financial choices and creating their own business plans.
