[RSVP for 11/10 Here](#)

Tues 11/17 at 5pm (Location TBA):

Dr. Jeffrey Loeb, MD, PhD, (below) works at the UIC College of Medicine and is the Head of Neurology and Rehabilitation Medicine

Tues. 11/10 (GBM) at 5 PM in LCF3:

Dr. Jesus Garcia (left) is a professor in the department of Physiology and Biophysics in the College of Medicine. His research focuses on signal transduction in skeletal and cardiac muscle and the regulation of muscle gene expression by calcium and extracellular signals. He previously served as a director of graduate studies in his department, and as a professor and admissions committee member of the MD/PhD program at UIC.

Dr. David Peace (middle) currently serves as both a professor and the training program director in the hematology and oncology division at the college of medicine. He is involved in basic and translational research in tumor immunology, acts as a principal investigator under the UIC Cancer Center and has patented methods to target the human immune system against mutated oncoproteins linked to malignant transformation.

Dr. Eunice John (right) specializes in pediatric nephrology at UIC with a special interest in neonatal nephrology, developmental renal pharmacology, pediatric hypertension and medical management of urological problems and renal problems related to systemic diseases.
